

Defence solutions

Key and asset management solutions

Who's targeting your assets?

Traka is the leading worldwide specialist in intelligent key and asset management solutions. We manufacture secure cabinet and locker systems that allow you to control and audit who has access to your valuable keys and assets – keeping them out of the wrong hands.

- Traka systems are fully automated negating the need for staff to manually issue keys and equipment
- With Traka you maintain a full audit of who has accessed which keys and equipment, and when. We can even go as far as confirming they returned your asset before they left the premises
- Traka's intelligent lockers and key cabinets are operated using our powerful software and can be fully integrated with your current access control system

Intelligent asset management

Keys for secure areas and facilities

Weapons and ammunition

Fleet and specialist vehicles

Laptops, PDAs and handheld data terminals

Security radios

Intelligent key and asset management for defence facilities

Key management

- Individual staff recognition ensures unique access permissions
- Automatically alert and notify should a key not be returned on time
- Audit and account for every key bunch 24/7 365 days per year
- Available as a stand alone or networked system
- Segregate operational and non-ops keys
- Fully scalable with systems managed from one central administrative pc
- Integrate with your access control system to ensure staff can't leave site without first returning their keys

Equipment management

- Ideal for laptops, data terminals, scanners, cameras and specialist equipment
- Manage, control and account for the use of shared portable equipment
- At all times know who has, or who previously used, portable pool equipment
- Deposit important paperwork, making it readily available 24/7 to selected staff

Weapon management

- Control who has access to weapons and ammunition
- Audit weapons usage, always know who has used them and when
- Create a controlled environment, so staff are accountable for weapons used
- Set recalibration and service intervals, so weapons are properly maintained

Fleet and specialist vehicle management

- Prevent unauthorised staff from driving fleet and specialist vehicles
- Always know exactly who was driving each vehicle and when
- Report on mileage, fuel, hours used and even where the vehicle is parked
- Enforce alcohol testing for drivers before their vehicle keys are released
- Vehicle defects reported by the user automatically generate alerts to the service team and can lock-out access to vehicles with faults

Security radio management

- Automatically vend radios from a secure software controlled cabinet
- Radios are available to authorised staff only
- Handsets are securely stored and accounted for, when not in use
- RFID tagging ensures every radio is uniquely identified and managed
- Integrated battery charging ensures handsets are always ready for use
